

The attached was discussed at USIB. It was agreed that as USIB considers the distribution of Estimates in the future AEC will be responsible for assuring that a USIB decision is made as to whether an Estimate containing atomic energy information should be transmitted to the Joint Committee on Atomic Energy. However, if an Estimate is to be passed to the Joint Committee, it will be passed by CIA as it is the DCI's document.

MEMORANDUM FOR: **THE DIRECTOR**

Attached is a proposed item for USIB consideration asking for their concurrence in our existing practice of making available atomic energy estimates to the Joint Committee on Atomic Energy. General Carter thought this should receive USIB attention and, in addition, suggested a preference that the documents actually be sent by AEC to the Joint Committee. Either CIA or AEC could provide the documents although the fact remains that these are estimates of the DCI.
